So I don't have to get home and find I need one And then get in the car and drive all the way back to the store to get one?Why does it just print a single page when I tried to print a 2 page document on my first attempt at printing?Why does it then tell me the Cyan is not a registered epsom ink cartridge even though it's the one that came in the box with my Epson printer?Why does it not move to the spot where I can take the cartridge out and put it back in after I've pressed the button for six seconds like your manual tells me?Why oh why oh why?.. You can view or download all Epson Printer user manuals, service manuals, user guides, quick start guide and owners manuals for free.. Why don't you specify on the box that USB cable is not included (as they are with HP printers etc) so I know to get one when I buy your printer.. If you have any questions about your Printer that are not answered in the manual, please share your question in the troubleshooting section on the bottom of this page.
